

## **PROCESS CONTROL ENGINEER Greenbushes Operations**

**Would you like to be part of a mine expansion that is powering the global energy revolution?**

**Do you want a residential lifestyle?**

**Talisson Lithium's Greenbushes Operation, a residential mine situated on the world's highest grade hard rock lithium resource in the south-west of Western Australia, is a leading global producer of lithium mineral concentrates.**

**Greenbushes is a well-established mining and processing operation in the exciting lithium industry. It has three open pits, waste dumps, tailings storage facility and two processing plants with a third processing plant under construction (for completion in 2019) and construction of a fourth processing plant approved by the Board. We are currently recruiting staff to manage the planned expansion.**

Reporting to the Electrical Supervisor, an opportunity exists for a suitably qualified Process Control Engineer to join our energetic and multi-disciplined Engineering team.

### **Requirements:**

- A degree in instrumentation & control engineering, or other relevant engineering discipline with more than five years' experience in a range of process control applications and associated instrumentation/equipment
- Processing plant based experience in PLC programming, SCADA design and configuration, and field Instrument selection & commissioning
- Proven technical documentation and problem solving skills
- Experience with change management within a control system environment
- A team-focused approach and excellent cross-discipline communication skills
- Demonstrated track record of process improvement
- Excellent verbal and written communication skills.
- A 'Can Do' approach to positively influence and coach, and a genuine enthusiasm to contribute to our team.
- Able to mentor the site electrical and instrumentation team

### **How to Apply**

Please forward your application to [jobs@talisonlithium.com](mailto:jobs@talisonlithium.com) including a covering letter, CV, copies of any qualifications and referees.

For further information, phone (08) 9782 5700.

This is a residential position on a 5:2 roster working a nominal 8 hour day. You are required to relocate and live within 75 minutes travelling distance of the Greenbushes mine site. A competitive salary and other benefits will be negotiated with the successful applicant.

Applications close 25 January 2019
